

Battery Emergencies and Electrical Storage Systems

Full Description:

The course gives the students information on the dangers associated with lithium-ion battery emergencies. Students are given knowledge on the uses, construction and hazards associated with lithium-ion battery storage systems. Students are also advised on firefighter personal protective equipment (PPE) needed to safely respond to these incidents as well as recommendations to coordinate the incident and mitigate the hazards. The students are also given an overview on lithium-ion battery vehicle emergencies and recommendations to handle them.
